Sanjay Chauhan

9327125365 smchauhan2004@gmail.com Palitana, Bhavnagar

DevOps fresher skilled in CI/CD pipelines, Docker containerization, AWS cloud deployments, Terraform, Linux, Git, Jenkins. Passionate about automation, scalability, and continuous improvement.

TECHNICAL SKILLS

DevOps & Cloud

- CI/CD: Jenkins, GitHub Actions
- Containers: Docker, Docker Compose
- Cloud: AWS
- Web Servers: Nginx
- OS: Linux (Ubuntu, Amazon Linux)
- Version Control: Git, GitHub

Infrastructure & Automation

- Deployment Automation
- CI/CD Pipeline Design
- Basic Infrastructure as Code (Terraform – learning)
- Monitoring (Basics – Prometheus/Grafana – learning)

Web & Programming

- HTML, CSS, JavaScript
- React.js
- PHP, MySQL

EDUCATION

BE - Computer Engineering
Gyanmanjari Institute of Technology

DE - Computer Engineering
Gyanmanjari Institute of Technology

SSC march-2020
Uttarbuniyadi Vidhyalaya Shetrunji Dem.

INTERNSHIP EXPERIENCE

1. Front-End Developer Intern | NITSAN Technologies (1 Month)

- Developed responsive web pages using HTML, CSS, and JavaScript.
- Followed secure coding practices and optimized UI/UX.
- Used Git and GitHub for version control and collaboration.

2. Summer Internship | Sidhwani Technologies (15 Days)

- **Tech: HTML, CSS, JavaScript, PHP, MySQL, Docker**
- **Containerized** web application using Docker for consistent runtime environments.
- Managed backend services and database integration using PHP and MySQL.
- GitHub:https://github.com/sanjayyy04/child_adoption_portal-internship-project

DEVOPS PROJECTS

GenZ AI (Gemini AI Clone)

- **Tech: React, GitHub Actions, CI/CD, GitHub Pages, Jenkins,**
- **Docker, Nginx, AWS EC2**
- Built a complete CI/CD pipeline using GitHub Actions, Jenkins.
- Automated build and deployment of a React application.
- Deployed the application on **GitHub Pages** and **EC2** with zero manual- steps.
- Live: https://sanjayyy04.github.io/GenZ-AI/

Deployment Automation Practice (AWS + Jenkins)

- **Tech: GitHub, Jenkins, Docker, AWS EC2, Linux**
- Designed CI/CD pipelines using **Jenkins** to automate application builds and deployments.
- **Dockerized** web applications and deployed them on **AWS EC2** instances.
- Configured **Linux servers** and managed application services.
- Used GitHub for source control and Jenkins for continuous integration.
